

FLEET MANAGEMENT

Your Fleet's Efficiency and Safety

From real-time GPS tracking to AI-driven fuel analytics, Hitrace provides the end-to-end visibility you need to reduce operational costs, eliminate unscheduled downtime, and scale.

Get Started

Fleet Maintenance & Operational Control

Fleet maintenance management solution: planning, monitoring, and expense tracking. Lower operational costs, prevent major breakdowns, and minimize time spent in service stations.

On-Time Schedule

Oversee Multi-Level Fleets

Define complex user hierarchies and granular access permissions. Allocate specific responsibilities to branch managers or dispatchers while maintaining a unified global view.

Critical Event Management

Respond instantly to overdue services, unauthorized vehicle use, or sudden financial spikes. Our dashboard prioritizes high-impact alerts.

Optimize Asset Utilization

Strategically organize workloads based on live vehicle health data. Identify inoperable units early and redistribute tasks.

Data-Driven Asset Renewal

Use detailed breakdown analytics to evaluate vehicle ROI. Pinpoint high-mileage assets that have become financial liabilities.

Operation of the Fleet Management System

Four interconnected workflows designed to maintain vehicle readiness and operational transparency.

01

Compile a list of vehicles

Catalog vehicle profiles, VINs, license plates, engine classifications, driver assignments, and fuel tank dimensions.

02

Define service frequency

Configure automated triggers based on cumulative mileage (e.g. 5,000 km oil change), engine operating hours, or calendar dates.

03

Add services & tasks

Assign work orders to authorized garages, log replacement parts, invoice amounts, and mechanic completion checklists.

04

Examine maintenance with reports

Review total cost of ownership (TCO) dashboards, cost-per-kilometer trends, and predictive failure analysis reports.

System Capabilities & Telemetry Support

Engineered to interface seamlessly with heavy trucks, construction equipment, and light commercial vehicles.

✓

Availability of data regarding mileage, engine hours, services, and detailed information for each vehicle.

✓

Automated service generation based on time, mileage, and engine hours for designated vehicles.

✓

System registration of works: categories, timeframes, replacement parts, costs, and inspection outcomes.

✓

Evaluation of services conducted across fleets, vehicle categories, and selected reporting periods.

✓

Integration with ERP, accounting, and parts inventory systems via secure REST webhooks.

Technical Protocols & Compatibility

Vehicle Bus Interface

J1939 (Heavy duty trucks), J1708, OBD-II (ISO 15765-4 CAN), K-Line.

Sensor Input Options

RS232/RS485 digital probes, 0-10V Analog inputs, 1-Wire iButton & RFID reader.

Connectivity & Failover

4G LTE Cat-1 / Cat-M1 with 2G fallback and offline flash memory for 100,000+ records.

Optimize Your Fleet Today

Start managing your fleet more efficiently with customized telematics.
