

AGRICULTURE

Smart Farming Solutions

A straightforward yet powerful solution for the agribusiness sector, enabling the management of field activities through telematics data.

AGRITECH

Field Activities & Telematics Management

Monitor plowing, harvesting, and cultivation cycles in real-time. Calculate exact acreage covered, track fuel rates across tractors, and prevent machinery misuse.

- ✓ Comprehensive field mapping & boundary geofences
- ✓ Engine hour tracking for preventive maintenance
- ✓ Real-time fuel siphoning & wastage detection

Field Activity Tracking

Monitor every single field operation in real-time. Precisely track plowing, planting, spraying, and harvesting routes to ensure total coverage without costly overlaps.

Equipment Management

Protect your high-value agricultural machinery. Schedule proactive maintenance based on actual engine hours rather than calendar days to eliminate unexpected breakdowns during peak seasons.

Environmental Monitoring

Integrate advanced sensors to track ambient temperature, soil moisture, and humidity. Use this granular environmental data to optimize watering and fertilization schedules.

Fuel Optimization

Stop agricultural fuel theft and reduce waste. High-precision tank sensors monitor fuel levels 24/7, instantly alerting you to sudden drops or highly inefficient operating rates.

Performance Analytics

Transform raw farm data into actionable insights. Generate detailed reports comparing yields, machine utilization rates, and operator efficiency across different plots of land.

Work Hour Tracking

Automate your agricultural workforce management. Accurately track operator hours, verify timesheets, and optimize labor allocation based on real-time field activity.

Actionable Agro Analytics

Generate detailed operational reports by season, machinery type, or field plots. Compare operator performance and maximize harvest yields.

Get Agri Solutions

Key Benefits for Agribusiness

✓ Dramatically increase overall crop yields and field productivity through precision agriculture

✓ Slash expensive equipment downtime and prevent catastrophic breakdowns with predictive maintenance

✓ Drastically reduce farming overhead by optimizing fuel consumption, water, and fertilizer usage

✓ Digitize your operations to automatically track, verify, and document all seasonal field activities

✓ Make confident, data-driven agricultural decisions that maximize profitability year after year

Modernize Your Farm Operations

Get precise data-driven insights for your agricultural fleet.
