

TRACKING

Real-Time Tracking Solutions

Real-time GPS tracking solutions for vehicles, assets, and personnel—engineered for control, efficiency, and security.

[Book a Demo](#)

Tracking Solutions

Tailored tracking configurations for any moving or stationary asset.

Vehicle Tracking

Real-time location monitoring, speed analysis, route history playback, fuel consumption metrics, and comprehensive driver behavior analytics designed for any vehicle type.

Asset Tracking

Monitor the exact location of valuable equipment, generators, or goods in transit. Utilize advanced geo-fencing and receive instant movement or tamper alerts.

Fleet Management

A robust, centralized platform for dispatch coordination, automated maintenance scheduling, compliance tracking, and deep-dive operational analytics reporting.

LIVE VISIBILITY

Complete Control Over Remote Operations

From central dispatch consoles to mobile field apps, Hitrace equips operators with instant telemetry, automated speed breach alerts, and intelligent geofence controls.

99.9% Uptime

Reliable satellite & cellular fallback connections.

Instant Alerts

SMS, email & push notification dispatch.

Core Features

Everything you need to monitor, control, and protect.

Real-Time GPS Tracking

Gain instant, second-by-second visibility into your entire fleet or asset inventory from any device.

Geofencing

Establish virtual perimeters and automatically trigger alerts the moment an asset enters or leaves a designated safe zone.

Route Optimization

Calculate and dispatch the smartest, most efficient paths to reduce mileage, cut fuel costs, and ensure faster delivery times.

Driver Behavior Monitoring

Protect your vehicles by monitoring and scoring drivers on speeding, harsh braking, rapid cornering, and excessive idling.

Reporting & Analytics

Generate custom dashboards and schedule automated reports to track ROI, fuel usage, and overall fleet performance.

Mobile App

Stay connected on the go with our fully-featured iOS and Android mobile applications, bringing fleet control to your pocket.

How It Works

01

Install Trackers

Our certified engineers covertly install high-precision, tamper-proof GPS trackers on your vehicles, heavy assets, or specialized personnel equipment.

02

Connect Platform

The hardware automatically connects to the Hitrace cloud platform, initiating a secure, encrypted stream of real-time telemetry data.

03

Track & Monitor

Log in via our intuitive web portal or mobile app to immediately begin tracking movements, monitoring engine health, and viewing live maps.

04

Act on Data

Utilize automated alerts, predictive maintenance reports, and driver scores to make immediate decisions that boost safety and profitability.

Benefits of Hitrace Tracking

✓

Achieve complete asset visibility and drastically reduce the risk of theft or unauthorized use

✓

Significantly lower operational costs by cutting unnecessary fuel burn and optimizing maintenance

✓

Enhance driver safety, enforce corporate driving policies, and ensure regulatory compliance

✓

Make rapid, informed business decisions backed by real-time telematics data and historical analytics

✓

Increase customer trust and satisfaction with precise dispatching and highly accurate arrival times

Gain Full Control of Your Moving World

Take the first step toward smarter tracking today.
